**Front cover:** The Breedon Hill limestone quarry seen  
from the north (see page 139). Photo P542174 from  
British Geological Survey.

**Back cover:** Coast erosion at Holderness, east of  
Hull, where cliffs of glacial till recede by successive  
rotational landslides, though armour stone and sea-  
walls protect hard points and cause increased erosion  
down-drift. Photos and map by Tony Waltham.
